📞 +98 921 256 0369

Have been programming mobile applications and backend services professionally for the past five years. My prior experience includes working with the [Zinglo](#) team, a startup enabling online sellers to close deals directly within Instagram conversations; [FlexiTrace](#), a posture and gait analysis mobile app offering corrective exercises; and [My Golrang](#), a cross-platform HR mobile app serving Golrang employees. I have also contributed to freelance projects and personal open-source initiatives.

Experience

Software Developer

ZINGLO, DUBAI, UNITED ARAB EMIRATES

JAN. 2025 - APR.2026

- Developed full CRM feature sets including product management, order handling, shop setup, and campaign management for an iOS application while collaborating with backend developers on mobile services.
- Developed several features to transform the app from a basic chat application into a channel-based messaging system for small businesses, including business information management and AI-powered direct message responses across social platforms.
- Implemented a user-friendly Instagram OAuth process with redirect link handling as an initial app step to simplify business information connection.
- Improved multiple existing app features including OTP login, dynamic onboarding steps, Matrix SDK updates, and enhanced analytics integrations.
- Developed a CI/CD GitHub workflow for iOS that automates app signing, versioning based on branch, archiving, and TestFlight deployment.

Software Developer

FLEXITRACE, ISTANBUL, TURKEY

MAY. 2023 - APR.2024

- Utilized ARKit Framework to develop tools for real-time body tracking and measurements.
- Utilized Apple image ML models and CoreGraphics APIs to develop a full posture analysis.
- Developed multiple backend services using FastAPI for managing and delivering corrective exercises.
- Collaborated with a backend engineer to implement user-specific features including Apple authentication, in-app purchase validation, and premium status management.

Mobile Developer

GOLRANG SYSTEM, TEHRAN, IRAN

APR. 2021 - MAR.2023

- Collaborated with other mobile team members to develop a scaled internal company app, which facilitated ordering food, requesting equipments, browsing paychecks and more.
- Participated in design and development of multiple mobile frameworks and packages, based on company internal REST APIs and usual mobile app requirements.
- Maintained and developed new features for three iOS legacy apps.
- Performed multiple pull request reviews for an intern developer, providing detailed feedback to enhance their code quality.

iOS Developer

FREELANCE, TEHRAN, IRAN

JUN. 2020 - APR. 2021

- Designed and developed various small iOS apps, established networking layers and custom JSON models to connect multiple apps to their REST APIs, and expanded my proficiency with essential programming tools including command-line interfaces, Git, and CI tools.

Personal Projects

- [ComicKhan](#): Comic-book (.cbz/.cbr/.pdf) reader iOS app.
- [Resimage](#): Command-line tool for resizing images.
- [QuChat](#): Terminal-based chat service with easy local deployment.
- [RainyText](#): Customizable Matrix movie rain animation.

Education

Semnan University

Bachelor's degree in Computer Hardware Engineering

Sept. 2015 - Sept. 2020

Technical Skills

Programming Language: Swift, Python, Rust

Technologies: SwiftUI, UIKit, URLSession, Combine, CoreData, iOS Concurrency, ARKit, Flutter, REST APIs, FastAPI, PostgreSQL

Knowledge: Object Oriented Programming, Protocol Oriented Programming, SOLID Principles, MVC, MVVM, Clean Architecture, Design Patterns, Unit Testing, TDD, Dependency Injection

Development Tools: Xcode, VSCode, Git, Command-line, Postman
